

# Tired, Nervous Mothers

A nervous, irritable mother, often on the verge of hysterics, is unfit to care for children; it ruins a child's disposition and reacts upon herself. She is a source of misery to every one who comes under her influence, and unhappy and miserable herself. She cannot help it, as her condition is due to shattered nerves caused by some feminine derangement, with backache, headache, and all kinds of pain, and she is on the verge of nervous prostration. Proof is monumental that nothing is better to regulate a woman's health than

## Lydia E. Pinkham's Vegetable Compound.

Thousands and thousands of women testify to this fact.

Mrs. Nellie Makham, of 151 Morgan St., Buffalo, N.Y., writes:

"Dear Mrs. Pinkham:—I was a wreck from nervous prostration. I suffered so I did not care what became of me, and my family despaired of my recovery. Physicians failed to help me. I was urged to try Lydia E. Pinkham's Vegetable Compound, and I want to tell you that it has entirely cured me. I think it is the finest medicine on earth, and I am recommending it to all my friends and acquaintances."

Mrs. Geo. A. James, a life-long resident of Fredonia, N.Y., writes:

"Dear Mrs. Pinkham:—I was in a terribly run down condition and had nervous prostration caused by female trouble, in fact I had not been well since my children were born. This condition worked on my nerves, and I was irritable and miserable. I had tried many remedies without getting much help, but Lydia E. Pinkham's Vegetable Compound brought me back to health and strength. It has also carried me safely through the Change of Life. I cannot too strongly recommend your medicine."

### MRS. PINKHAM'S INVITATION TO WOMEN.

Women suffering from any form of female weakness are invited to communicate promptly with Mrs. Pinkham, at Lynn, Mass. From the symptoms given, the trouble may be located and the quickest and surest way of recovery advised. She will hold your letter in strict confidence as indicated by the fact that every private letter received by her during the last twenty years, and more, she now has in the Company's laboratory under lock and key, and no testimonial has ever been published without special written permission. Her advice is free and always helpful.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND, a woman's remedy for woman's ills, made from Native Roots and Herbs, complies with all conditions of the new Pure Food and Drugs Law, and is so guaranteed.

## RAILROAD NEWS.

Harvey Eating House System Has Large Interests in Newton.

Operate Big Dairy and Poultry Farm There.

RAISE OWN PRODUCTS.

One Reason of the Popularity of Santa Fe Eating Houses.

Other Items of Interest to Railway People.

Newton, Kan., Oct. 23.—The newly improved dairy and poultry station owned and operated by the Fred Harvey eating house system is now running at full capacity. The farm, as it is called, has been in full operation all season but with the new work being completed the system on which the plant is run has been more fully perfected. While this institution has been operated here for many years, there are comparatively few persons familiar with the method and equipment in use by this system in supplying the provisions for the various hotels over the Santa Fe railroad company's territory. A new freezing and cooling room has been built at the farm this year, a carbonating factory has been put in operation and various other improvements added. The dairy is also an addition made during the summer. The new freezing and cooling rooms stand to the north of the farm and were built in connection with the office and packing room. The "cold" rooms are built of brick and have a cement floor, great precaution having been taken against allowing the outside air to invade their interior. The chilling room is separated from the freezing room by a partition a foot and a half thick and the two rooms taken together are forty feet long and each has a width of fifteen feet.

The rooms are cooled by a refrigeration plant which is also an addition to the equipment. The refrigeration is produced in the same manner as the manufacturing of ice, only in the room where the chill is produced the water drips through the pipes instead of over them, a complete circulatory system being used. The packing room is also in the same building with the refrigerator rooms and at the west of the building a separator room has been built. Great care for the cleanliness of this room has been taken and every can used in the dairy is thoroughly washed by steam before and after milking.

South of the building comes the newly equipped building for the bottling of the pop used by the Harvey News department. This room is 50 feet long by 20 feet wide and is built in a most substantial and convenient way. A cement floor has also been laid here. The equipment consists of an American carbicator and a Crown corker, besides the various other appliances for use in the manufacture of the drink. A. G. Radtke is in charge of this department of the work and the capacity when running at full blast is 100 cases of pop per day. In the same building is the engine and boiler room, also the

Linde ice machine for refrigerating purposes. James Reno has charge here.

The dairy sheds are built south and west of the engine room and are built in accordance with the other buildings on the farm. At present thirty cows are milked but this provides only for the Arcade hotel at this place. Mr. Cornforth, manager here, buys the cattle for the other dairy stations of which the company have several throughout the west. For the feeding of the cattle the company has leased in the neighborhood of 300 acres of hay and pasture land which adjoin the site always occupied.

The poultry farm might be termed an old institution for this place and it is the only one on the Harvey system, the chickens being supplied from this point for the entire line of hotels. For two weeks before the chickens are to be killed they are placed in what is known as the feeding station and are fed upon buttermilk, corn meal, and oat meal which produces fat and also for killing and eating. In the neighborhood of 3,000 fowls are kept in the feeding pens all the time and the number killed will average about 1,000 fowls a day.

Shipping days at the farm are on Tuesdays and Fridays when a car is loaded for the west. About 1,000 chickens and 150 ducks are put in this car twice a week. The meats for the system are purchased from the Morris Packing company of Kansas City. On Tuesdays and Fridays the meats are shipped for the extreme west on all days of the week. For the teaming, two teams of horses are kept and they are familiar to every one in Newton as they are fine specimens of their kind.

E. H. Mueller looks after the workings of the farm for Keith Cornforth, who is manager. The farm as a whole in its improved condition is a great institution for Newton and particularly the surrounding country as the larger part of the produce is purchased here and from the farmers. Mr. Cornforth buys the larger number of cattle for the other dairies and also the feed to be shipped as far west as the Grand Canyon. The all-time motto holds good with the Harvey system in all departments. "The best is not too good for you." At the present time twenty-three men are employed at the farm and each man has his own line of work to care for.

### OKLAHOMA RATES HIGH.

Congressman McGuire Will Consult Commerce Commission.

Guthrie, Okla., Oct. 23.—Declaring that the investigation he has conducted since the close of the recent campaign shows the railroad rates in Oklahoma higher than in Kansas, or the other states of the union, and that the treatment of the people by the railroads is unjust, Congressman-elect Bird S. McGuire announced before his departure for Washington today that he would take up the railroad question with the interstate commerce commission.

He said: "The making of the Indian allotments, with the exception of the homestead, has been a failure. The restrictions will be my chief work in congress and the fighting of the battle for better freight rates is my immediate task before the department at Washington this winter."

The rates affect practically all articles and I will file a request with the interstate commerce commission for hearings in Oklahoma, the state authorities can do much, but the greatest good must come from the interstate commerce commission, as the state can not reach the interstate business."

### MORE PASSES CUT OUT.

Result of the New Law Now Effective in Texas.

Austin, Tex., Oct. 23.—In reply to a letter of inquiry from an attorney at San Antonio, the assistant attorney general of Texas has advised him that the following prohibitions are occasioned by the anti-pass law of the state:

Free transportation to place of the burial of an employee of a railroad killed or dying of disease at a point on its line other than his home.

The issuance of free transportation to the relatives of an employee who is killed in the service who are not dependent members of his immediate family, either to the place of burial or to any other place along the line of the road.

Free transit after the death of the employee, of the goods of his widow to some other point on the line where her permanent home is located.

Free transit of the members of the family of an employee, after his decease and who has been killed in the

service or died by reason of injuries sustained.

Before this or the interstate rules were enacted, these things were done without question or hesitation by all roads.

### GARDNER MOVES UP.

Northwestern Official Becomes President of the Omaha.

Chicago, Oct. 23.—W. A. Gardner, vice president of the Chicago & North-western in charge of maintenance and operation, received the congratulations of his many friends today on his promotion by his election as president of the Chicago, St. Paul, Minneapolis & Omaha. The promotion comes to Mr. Gardner in recognition of his ability as an operating official, which has been demonstrated continuously since he entered the service of the northwestern system twenty-nine years ago. His promotion has been steady and continuous, until he has only one more step to place him at the head of the entire Northwestern system.

As an operating official Mr. Gardner, in the estimation of his conferees, is out-ranked by none in the country, and the universal verdict on his selection as head of the Omaha is that a better man for the position could not have been found.

It will be gratifying to Mr. Gardner's many friends here to know that his promotion does not mean his loss to Chicago. It will not in any way change his relations to the Chicago & North-western proper, of which he still continues vice president in charge of maintenance and operation. As such he will continue to have supervision of the creation of the company's new terminals in this city, and devote his energies to hurrying the plans to completion.

### WILL BE NO STRIKE.

Telegraph Operators Will Not Leave Rio Grande.

Denver, Oct. 23.—There will be no strike of telegraph operators on the Denver & Rio Grande railroad on account of the discharge of Wire Chief R. H. Skeggs of Grand Junction.

Mr. Skeggs, in a letter to President Perham of the O. R. T., announced yesterday that he had made arrangements to go into the real estate business in Grand Junction. He said that he did not want the operators to go on a strike owing to, as he knew, they would suffer many hardships and have a long, hard fight before them. He concluded his letter by condemning in severe language the position taken by the road. After receiving the letter President Perham announced there would be no strike.

### HE DIDN'T LOAF.

William Allen White Tells, and Writes a Big Story.

Many people seem to think that while W. A. White was away for four months he was loafing. He brought back the manuscript of a 200,000 word story which will make a book as long as all the other books he has written put together. He was not writing a play—as the Star said. He has never tried a play, the fact is that a man who doesn't get into the Emporia opera house except when the Old Fiddlers hold their contest, or a gold minstrel show comes to town, has no business trying to write a play. The story may be too long to run as a serial, but if it does run as a serial it can not start this year—as all serials start in the fall, and unless this goes in a weekly it will have to wait for serial publication until 1908, and come out in book form in 1909.—Emporia Gazette.

A brain regularly nourished by proper food will have incentive and power for successful work.

Grape-Nuts is a true brain and nerve food. Made of whole wheat and barley, it contains the elements of vital energy—quickly absorbed by the system—which nourish and rebuild the gray matter of the brain and nerve centres.

"There's a Reason." Read "The Road to Wellville" in pkgs.

## AT JACKSON'S TOMB.

President Roosevelt Speaks for Golden Rule in Government.

Nashville, Tenn., Oct. 23.—Never before has Nashville been so elaborately decorated as it was when welcoming President Roosevelt, bunting, flags, banners and pictures of the president were on almost every house in the up-town section of the city which was crowded with people from a radius of a hundred miles.

The special train entered the Union station amid the booming of cannon, ringing of bells, shrieking of whistles, and the cheering of thousands. The street parade led by the chief executive was a continuous ovation.

At the Hermitage the president spoke briefly in eulogy of Andrew Jackson. Shortly afterward he departed for Chattanooga.

In the course of his speech when referring to the charge that his policy is responsible for the pending trouble in

Wall street, he said: "I am responsible for turning on the light, but am not responsible for what the light showed. It is impossible to cut out a cancer without making the patient feel for a few days rather sicker than he felt before. No material well being can save this nation if it loses the lift towards higher things. I will permit neither the tenacity and operation of the reactionary on the other to drive me away from the course or policy which I regard most vital for the well being of this nation. And the thing most important to remember is that policy has two sides. It would indeed be an evil for this nation if we ever permitted to grow up a spirit which would discriminate against the honest man who achieves business success. There is nothing meaner than the hatred of the man who prospers honestly, simply because he has prospered."

If ever there should be any temporary gusts of popular feeling that demands what is wrong, what is unrighteous, then the true servant of the people is the man who disregards that temporary wish of the people to do evil. (Great applause). No man will bring justice to his neighbor on the defense of property, so long as it is honestly acquired and honestly used. (Cheers). I will stand against crimes of brutal violence, just as I stand against crimes of unscrupulous cunning. There are certain gentlemen who say that I have talked against men of wealth as such. Those gentlemen are blind if they see the facts in that light. I will protect in every way in my power honest property.

I will protect the honest man of wealth to the extent of my ability and in no way can I ultimately protect the honest man of wealth so effectively as by doing everything in my power to bring justice to his neighbor on the defense of property, so long as it is honestly acquired and honestly used. (Cheers). I will stand against crimes of brutal violence, just as I stand against crimes of unscrupulous cunning. There are certain gentlemen who say that I have talked against men of wealth as such. Those gentlemen are blind if they see the facts in that light. I will protect in every way in my power honest property.

Those gentlemen are blind if they see the facts in that light. I will protect in every way in my power honest property.

### Topeka Men at Emporia.

The work of excavating for the block of brick paving on Merchant street between Sixth and Seventh avenues will be begun this week. Abe Fulford, of Topeka, manager of the excavating gang for Haskins & Ramsey of Topeka, arrived in Emporia last night and has been hiring teams and men today. Haskins & Ramsey finished a big paving contract on which they have been working at Salina, last week, and their tools and machinery were sent at once to Emporia. The brick and cement were bought some time ago and will be here by the time the workmen are ready to use them. If the present good weather keeps up until the concrete base and the curbing are completed, Haskins & Ramsey will have no difficulty in finishing the work. Frost and cold weather cracks cement and would delay the work considerably, but the bricks can be laid in winter as well as summer.—Emporia Gazette.

### No More Money on Cotton.

Houghton, Tex., Oct. 23.—The Texas Farmers' Cotton Union Cotton company announces that no further advances will be made on cotton and the effort to hold the crop of the state for 16 cents is believed to be a failure. More than \$75,000,000 is tied up in loans on the crop.

### Give Kansas Girl Big Audition.

Miss Lapham, who plays Friday on the stage, is a Kansas girl and is glad of it. She went after the best kind of a musical reputation, and won it. From the days of her childhood in Kan-

sas to the present time she has been a tireless worker and an intelligent one. This added to her natural endowment for the art has rendered her remarkably successful. Mrs. Charles Gled listened to her playing in Chicago and determined at once to bring her to Topeka at the first opportunity. Miss Clara Frame of the State Historical society and others in the city know Miss Lapham and her work and are enthusiastic in praise of both.

## HE SUES M'CLURE'S.

San Francisco Police Commissioner Asks Damages of \$100,000.

San Francisco, Oct. 23.—Former Police Commissioner Thomas F. Regan began suit in the United States circuit court for \$100,000 damages against the S. S. McClure company yesterday, and for a like sum against the San Francisco News company in the superior court of Marin county for defamation of character. Regan bases his suit on articles published in the September number of McClure's magazine, entitled "Eight Years for Reform in San Francisco," in which he is specifically charged with having "graft" with Eugene E. Schmitz.

### Left \$5,000,000 for Orphan Girls.

Philadelphia, Pa., Oct. 23.—It is announced that the will of Robert N. Carson, a millionaire of this city, who died suddenly in a theater here last week, provides for a \$5,000,000 institution for orphan girls patterned after Girard college in this city which is exclusively for boys.

### Francis Joseph Is Better.

Vienna, Oct. 23.—For the first time during the illness of Emperor Francis Joseph a bulletin signed by his doctors has been issued. It states that the emperor is progressing toward recovery.

## Food Poisons.

90 Per Cent of All Diseases the Result of Undigested Putrefying Foods.

Men of affairs, women of society and children with active brains are too often sedentary in their habits, giving little time to exercise. To this evil is added that of high and irregular living—as a result, the stomach cannot stand the demands made upon it. The abused and overtaxed stomach does not properly do the work of digestion, food taken in ferments and the poison enters the whole system. The body loses in weight and becomes a prey for the attack of whatever disease it may encounter.

Did it ever occur to you how busy that stomach of yours is? It only holds three pints, but in one year you force it to take in 2,400 pounds of material, digest it and prepare it for assimilation into the blood. No wonder it rebels when overworked. We crowd it with steaks and pastry, irritate it with juices with spices and acids, and expect the stomach to do its work. It can't do it.

All over the inner layer of the stomach are glands which secrete the juices necessary to digestion. The entrance of food into the stomach is the signal for these glands to do their work. The more the food, the greater the more indigestible, the greater the demand upon them and upon the muscles of the wall adjoining.

Think of the tons of high-seasoned game, sweetmeats and appetizers crammed into this little four-ounce mill, and then wonder, if you will, why you are dizzy or nauseated or constipated. Don't blame your stomach or curse your fate that you should be born so unfortunately. Blame yourself and apply the remedy.

First, get a small package of Stuart's Dyspepsia Tablets, taking one after each meal and at bed time. They are not a medicine, but a digestive. Your stomach is worn out and needs help, not medicine. Stuart's Dyspepsia Tablets will do the work that the stomach fails to do. There's enough power in one grain of Stuart's Dyspepsia Tablets to digest 3,000 grains of ordinary food, so you needn't fear that anything you eat will remain in your stomach undigested.

Stuart's Dyspepsia Tablets will rout the poison because they remove the cause—food fermentation. They are nature's own cure for dyspepsia. The host of troubles dyspepsia is father of cannot be numbered, for a healthy stomach is the source of all health.

Seize your opportunity before worse conditions confront you. Send today for a free trial package of Stuart's Dyspepsia Tablets. They will bring your stomach relief. F. A. Stuart Co., 150 Stuart Bldg., Marshall, Mich.
